AWS Certified Machine Learning Engineer – Associate

AWS Certified AI Practitioner

LFEL1004: Authentication & Authorization for Web/API

AWS Certified Solutions Architect – Associate

Tumelo Tshana Konaite

Data Scientist | Machine Learning & AI Engineer
Johannesburg Metropolitan Area

Summary

I'm a data-driven professional with an MSc in Computational & Applied Mathematics, working at the intersection of data science, machine learning, and software engineering.

I design and build production-grade data and AI systems — from data ingestion and feature engineering to NLP models, APIs, and cloud deployment. My work focuses on turning unstructured and complex data into reliable, scalable solutions that support real-world decision-making.

I have strong hands-on experience with Python and SQL, and I've worked on projects involving NLP, generative AI, semantic retrieval (RAG), predictive analytics, and risk-oriented data workflows. I care deeply about code quality, testing, reproducibility, and maintainable system design, especially when models move from experimentation into production.

I enjoy collaborating across product, engineering, and business teams to translate open-ended problems into well-engineered, data-driven solutions. I'm particularly interested in applying ML and GenAI in financial services, analytics platforms, and large-scale data systems.

Always learning, always building — and always focused on delivering AI that actually works in practice.

Experience

Huawei

Data Analyst & Automation Engineer | Huawei
December 2019 - December 2025 (6 years 1 month)

- Developed Python-based data pipelines and automation workflows to preprocess, transform, and analyze structured datasets, improving model readiness and operational efficiency.
- Performed exploratory data analysis (EDA), feature engineering, and statistical modeling on large datasets to uncover trends, generate insights, and support predictive decision-making.
- Designed and optimized advanced SQL queries for large-scale data extraction, transformation, and integration into machine learning pipelines and analytical dashboards.
- Led data-driven initiatives leveraging predictive analytics and performance metrics to improve project forecasting, optimize resource allocation, and increase delivery success rates.

University of the Witwatersrand

Mathematics Tutor

January 2019 - December 2019 (1 year)

South Africa

Education

University of the Witwatersrand

MSc in Computational & Applied Mathematics (2021 – 2024), Computational and Applied Mathematics · (January 2021 - December 2024)

University of the Witwatersrand

Bachelor of Science (Hons) Mathematics, Mathematics · (2019 - 2019)

University of the Witwatersrand

Bsc, Computational and Applied Mathematics · (2016 - 2018)
